

Product Information - mobileFloww®

The mobileFloww is the smallest of the Floww Health Technology products which has been developed to help protect and maintain the natural energy of the human system while using a mobile or cordless phone by changing the non-ionising electromagnetic radiation (hereafter referred to as EMF radiation) emitted from a mobile or cordless phone.

How does the mobileFloww work?

The mobileFloww was developed in accordance with the principle of resonance. It consists of a circuit of electronic components which respond to the radiation emitted by a mobile or cordless phone. The mobileFloww resonates with this EMF radiation and creates a subtle but distinct field which is 'fed' by the radiation emitted by the mobile phone. This field, which we call a Floww Field, serves to offset the possibly harmful EMF radiation which is emitted by a mobile or cordless phone whether it is in use or on standby.

Range

The mobileFloww creates a Floww Field of approximately 50 centimetres around the mobile phone.

What is Floww Health Technology?

Floww International develops and manufactures technological products which utilise radiation to create a Natural Floww Field. The goal of the natural Floww Field is to protect people from radiation using a natural process. The technological products are collectively known as Floww Health Technology. People who use Floww Health Technology report feeling more relaxed and more energetic.

Can EMF radiation influence our health?

The human body can experience disturbances in EMF radiation loaded environments, when the EMF radiation originates from, amongst other sources, wireless internet, transmitters for mobile phones, wireless telephones (DECT) and wireless routers. EMF radiation can be absorbed by the body, which can subsequently affect health and wellbeing.

For information about medical complaints which can be a result of EMF radiation see the warning from German doctors and professors, who have noticed a connection between electromagnetic EMF radiation and a number of medical complaints, such as headaches, fatigue and problems with concentration (source: Freiburger Appeal 09-10-2002). For more information and scientific research regarding EMF radiation and health contact Bio Circuitry.

Use of the mobileFloww with other Floww products

The mobileFloww was developed to be used on its own or in conjunction with the personalFloww and homeFloww products. The mobileFloww is an essential additional device because a mobile phone is a source of EMF radiation to which people are exposed repeatedly and the distance between the source and the user is very small.

Disclaimer

Floww Health Technology products are not medical devices. You should always consult your doctor if you have a medical complaint. Only use Floww products as advised by your doctor or therapist or as instructed on the instructions for use.

Instructions for use - mobileFloww

The mobilefloww has a self-adhesive backing and can simply be stuck to the back of a mobile phone, cordless phone or tablet.

Step 1

Clean the back of your phone with the alcohol wipe provided.

Step 2

Remove the backing from the adhesive on the mobileFloww

Step 3

Stick the mobileFloww on the back of your phone as close to the aerial as possible.

When it is time to replace your mobile phone simply remove the mobileFloww from the back of your phone (using a blunt knife works well), clean off any tape residue and stick your mobileFloww to your new phone using double sided tape.

Even with a mobileFloww on your phone, we still recommend you use the speaker function when you are using your phone.

Possible withdrawal symptoms

During the first week of use of your mobileFloww it is possible you may experience mild withdrawal symptoms which can include mild headache or nausea. We believe this is because the body is no longer being exposed to the distorted frequencies it has become accustomed to. If these symptoms persist for more than a week please contact Bio Circuitry in Australia.

When you first start using Floww Health Technology products make sure you drink sufficient water. The recommended amount for adults is at least 1.5 litres per day. Children over 12 years of age should drink at least 1 litre per day and children under 12 years of age half a litre per day.
